Life Safety and Security Door Hardware

Integrated Door Security Systems

Safety, Security and Risk Management

Detex designs for education

Today, life safety and security for students and faculty are priorities in every educational setting. Detex is meeting the challenge with products and systems designed especially for education buildings and campuses.

INCLUDED IN
HARDWARE KIT

Door hardware made for A+ reliability

More than just for main doors, Detex hardware is designed for many different door applications requiring life safety and security hardware. From main entry doors to employee entrances, from auditoriums to outdoor gated areas—everywhere that security is a priority, Detex is at work. Our hardware is engineered for dependability in critical situations and is known for no-fail performance under the most demanding circumstances.

Where trust is built

Chosen by architects, locksmiths, campus security, maintenance supervisors and contractors who need hardware that has the options they want, our hardware is easy to install and requires minimum maintenance.

Industry professionals know from experience that Detex products will always work when called upon.

Life safety and security hardware for any campus application

Many of our hardware products have been developed specifically for use in schools and universities. Life safety issues must be addressed daily by educational institutions of every kind, all of which have a major concern: protecting students, teachers and staff. Access and exit control has become critical, and movement must be monitored at all exterior and interior doors, allowing them to open in an emergency or—equally important—preventing unauthorized entry. That’s where Detex comes in, with the most advanced life safety and security hardware for controlled entrance and exit.

Engineered to take high use and high abuse, our hardware for schools has evolved with the help of customer input, backed by our decades of experience in the marketplace. From classroom doors to auditoriums, main entrances to side doors and service entrances, every education application is covered by our product line.

New systems designed for your specific needs

Our new systems put together all the products necessary for specific education applications, including multiple function situations. You can choose hardware that provides the level of functionality that is most efficient and effective for your needs. Once you select the exact functionality you require from one of our systems, you can be sure that they will integrate properly and work perfectly as a system. Without compromise.

Our education systems include applications for lockdown control, outdoor areas, door prop alarms, and more. Detex system products also give you the advantage of simple installation with any hardware you already have in place, such as tailgate detection devices, door prop alarms, or video monitoring systems.

Advantex® quality, ValueSeries® functionality

If your school buildings are in the planning stage—or have been in use for years—we can match your needs. Choose from our premium-grade Advantex panic hardware, engineered with good-looking finishes, and sleek, no-hook profiles, or our ValueSeries hardware that offers many of the same benefits as Advantex but with the option of more economical finishes. Either brand offers the durability to withstand the rigors of heavy use by students.

Centralized control in campus emergencies.

Lockdown System

Locking down external doors quickly is essential in threatening situations. Manual lockdown can take thirty to forty-five minutes or more, but with our electrified Lockdown System it happens with the push of a button in the administrative offices, saving critical minutes. Making sure that unauthorized people don’t gain entry, controlling access within the building, and allowing easy exit in an emergency are all accomplished rapidly with centralized control.

- **Lockdown System Components** include durable Advantex panic hardware with electric latch retraction or electric dogging, remote control switches (central or multiple) for immediate lockdown, and power supplies.
- **Auxiliary Security Equipment** door prop alarms to alert staff of open exit doors, vandal-resistant breakaway trims, door position switches, and the ProxiPen proximity-based system for guard tour verification.
- **Lockdown EasyKits®** include components for easy installation in your facility.

Protection for outdoor areas.

Outdoor Area System

Exclusive to Detex, our weatherized panic hardware is ideal for outdoor student activity areas or fenced and gated areas that need to be protected from unauthorized entry while still providing emergency exit in panic conditions. Our Outdoor Area System offers Advantex quality, so it is extra durable in outside environments and has a safe, smooth surface that comes in a variety of complementary finishes. Even if your application is complex, you can order an EasyKit with components appropriate for your needs.

- **Weatherized Panic Devices with delayed unlocking** (where permitted by code) sound alarm and notify staff of exit attempt. Allows exit after 15-second delay.
- **Access Control Devices** allow entry from outside with keypad or card reader.
- **Weatherized Door Prop Alarms** warn that door or gate is being held open. Battery powered or wired.

An open and shut case for security.

Door Prop Alarm System

When school staff prop open a door to step outside for a break, they may not realize that they have created both a security hazard and an energy drain for the building. Detex 9VDC battery powered Door Prop Alarms are designed to alert staff with a 100-decibel alarm that can be field-set for door-open times ranging from one second to two minutes. Ideal for retrofits, the EAX-300 requires no electrical connection and is quick and easy to install. Hard-wired systems are also available.

- **Magnetic Door Contact**
- **Remote Alarm**
- **Wall Mounting Kits** have various features to meet any system need.

Hands-free access.

Automatic Swing Door System

For doors that require access without hands-on door contact, Detex A019 Automatic Swing Door Systems allow easy entry and exit. A workhorse on the job, the Detex A019 features a heavy-duty, direct-drive motor that can operate light or heavy doors in low energy applications.

Detex is the only manufacturer to integrate all automatic door and associated controller components, pre-wired in one unit that's easy to install, wire and service. AOD EasyKits include the Advantex latch retraction exit device and the A019 operator with built-in power supply.

- Exterior doors automatically open with pushpad. Security locking and panic unlocking after hours.
- Interior doors automatically open from pushpad, keypad or card reader. Alarm sounds during 15-second delay to alert staff to unauthorized entry attempt, and monitoring station is alerted before latch opens.

One entry at a time.

Tailgate Detection System

For restricted access rooms where a security card or keypad code is required for entry, you want to be sure that no one is able to slip through undetected behind someone else. The Tailgate Detection System will alert remote monitors to attempted entry. The system is compatible with most access control technologies and is easy to retrofit.

- **AT5200 Tailgate Detection System** employs infrared sensor beams to detect followers, so that unauthorized people trigger an annunciated alarm.
- **Access Control EasyKit** systems provide the components you need and are easy to install.
- **Door Prop Alarms** alert you to an entrance door that has been deliberately propped open to permit unauthorized entry.

Extra-tough hardware.

Maximum Security System

For education applications that need high security as well as panic hardware, Detex offers a choice of very powerful deterrents. Computer rooms, back doors in cafeterias, storage rooms —any door that might be vulnerable to high security break-ins, our Detex Maximum Security System provides reliably strong protection.

- **230X MAX Multi-Point Panic Hardware** is engineered for maximum locking strength with extreme-duty, triple-bolt design that withstands 16,000 pounds of pull force. Single- and double-bolt and weatherized models available.
- **V50 and 20 Series Surface Vertical Rod Exit Devices** for double doors offer dependably tough protection.
- **DX Bolts** further secure outside area by preventing hinge cutting.

More options at every entrance and exit

Only Detex offers you system options to fit your specific needs, from basic to more advanced. All of our hardware systems are field-proven to integrate and work, without compromise.

Indoors, outdoors, back and side doors, Detex has the right hardware for the life safety and security requirements at education premises. From auditorium doors to exterior gates, tailgate detection entrances to delivery doors, automatic doors to guard tour verification, every education facility application is covered in our inventory.

Classrooms, cafeterias, courtyards—Detex handles them all

The Detex product line offers special features and functions designed for educational use wherever safety, security and ease of maintenance are paramount. Whether your order is for new construction or a retrofit of an older building, Detex life safety and security hardware can provide exactly what you need from an extensive inventory of products engineered to suit your requirements.

For interior or exterior doors, for outdoor gates, for electrified options or the simplicity of EasyKits—for any life safety and security application at your education facility, Detex has a range of solutions that will make your responsibilities easier to manage.

As panic hardware has taken on an even more critical role in academic environments, the quality that Detex brings to the job has become a deciding factor in purchasing decisions. Where life safety and security are at stake, Detex meets today's education needs without compromise.

Long life, low maintenance and repair costs

Durable and well-made, Detex products are designed to last a long time with fewer problems, and that means savings in maintenance and replacement costs. Because we constantly solicit input from our customers to ensure that our products are meeting our high standards in the field, we know that you appreciate the value of quality. Locksmiths like the ease of installation, maintenance people are pleased with the dependability, architects recognize the handsome design. They all put their trust in Detex for trouble-free performance.

When you call, our experienced customer support staff is ready to answer your questions about your specific education facility applications.
