Rim with small format interchangeable core cylinder (SFIC) (K7)	DPDT

Note: The ES452 does not accommodate Rim hardware or cylinder

PRODUCT DESCRIPTION

The ES450 Series provides a reliable and attractive key switch control to release and shunt secured contacts. These units are typically mounted near the secured door. The ES450 Series is designed to provide remote Status LED and Bypass functions for the ES4200 and ES4300A door alarms, in addition to use in a wide variety of stand-alone applications. Key Switches are available in a number of configurations, including Double-bitted, Barrel, and RIM Cylinder. When Key is turned clockwise the contacts change state. When Key is restored to full counter clockwise, contacts return to normal.
